

# LAURA ASHLEY

- Extra large sewing area
- Advanced needle threading system
- Over 600 stitches including lettering and buttonholes
- Up to 1,000 stitches per minute
- ICAPS - Continuous Automatic Pressure System
- Pivot function

# Exquisite design meets sophisticated technology

The Laura Ashley Innov-is 2000 sewing machine from Brother delivers an impressive range of features for the most demanding sewers and quilters. No other machine offers this level of reliability, flexibility and value.

## Pivot function

Select the pivot function to have the machine simultaneously lift the presser foot while keeping the needle lowered. This allows you to keep your hands free to rotate your fabric and make perfect corners every time.

## Advanced LCD screen

Use the large monochrome touch screen to manage all your sewing and quilting functions:

- View on-screen information in 13 languages;
- Select, create and save stitches;
- Access quick reference stitch guides and help screens.

## Stitch editing feature

Found a stitch that's close to what you want but not quite perfect? Simply use the stitch editing feature on the LCD screen to adjust the width, height, density and size of many of the machine's built-in stitches.

## Adjustable presser foot height and pressure

Must-have features for quilting! Adjust the presser foot height to allow thicker sections to pass under the foot. Change the presser foot pressure to align with the feed dog motion for improved delivery of fabric height variations.

## 631 built-in stitches

An impressive assortment of sewing, quilting, utility and decorative stitches, including 12 buttonhole styles and three sewing lettering fonts, will help you add a special finish to all your creations.

## Key feature

5 quilting and appliqué feet including

- 'C' foot for more control
- 'O' foot for more visibility
- 'E' see-through foot for precise echo quilting
- Walking foot for smoother feeding of multiple layers
- ¼" quilting foot with guide for evenly spaced rows of stitches.

## Bobbin work

Add impressive stitching to your projects with the included bobbin case for bobbin work, which allows you to use a variety of decorative threads in your creations.

Use the new bobbin case to create reverse 'upside down' sewing with speciality threads that don't fit through the eye of the needle, and experience the delight when you turn the fabric over to see the raised 3D stitches you have added to your creation.

## ICAPS feature

The machine's built-in ICAPS (Innov-is Continuous Automatic Pressure Sensor) feature provides sensors that detect varying fabric thicknesses so you can stitch intersecting seams, quilts with varying fabric types, appliqués and embellishments with confidence.

Whether sewing silk, denim or leather, the presser foot will float over your fabric without hesitation and deliver smooth, even stitches every time.

## Circular sewing

Make concentric circles, arcs and more by simply using the measured circular attachment provided.

The included braiding and cording feet allow you to embellish your creations with decorative threads and trims for that special finishing touch.

# Cutting-edge features that bring a professional look to your sewing and quilting projects

## Multi-directional sewing

Sew straight in eight different directions, including sideways left or right, which eliminates pivoting of material, and in four directions with zig zag. Sew extra large 40mm wide side feed decorative stitches.

## Super bright LED work lights

The super bright, independent lighting in the needle and work area helps reduce eye strain and brightens the details of any project.

## Computer connectivity

Keep your machine up-to-date for years to come by simply connecting it to your computer with the cable provided. Follow on-screen instructions to download free machine updates or to save your customised stitches directly to your computer.

## Combine stitch patterns

Combine or mirror image stitches to create your own unique patterns and then save them to the machine's memory or to your computer via the included USB cable.

## Knee lift

Free up your hands by using your knee to lift the presser foot up – ideal for working on large projects such as quilts.

## 2-pin spool stand

Detachable 2-pin spool stand for large thread cones. Perfect for quick thread changes or twin needle sewing.

## Back to beginning feature

Helpful for building a combinations of stitches, this feature allows you to finish a segment and restart your pattern at the first stitch of a design when you resume sewing.

## Extra large extension/table included

The flat and wide workspace allows you to easily control fabric, even on the largest of projects such as bedding and quilts.
