## Scan & Cut CM600

Scan any image or sketch, then precisely cut the shapes or outlines – without design cartridges or a PC.

- 300 dpi built-in scanner
- Five fonts and 600 built-in designs including 100 quilt patterns
- Scan your design and save it as a cut or draw file
- Optional pen draw

# Welcome to the world's first home and hobby cutting machine with a built-in scanner. Welcome to a whole new world of innovation.

## 300 dpi built-in scanner

Scan virtually anything – a handmade drawing, a magazine clipping, cherished photos and more – create endless cut designs and save to the machine's memory.

## Scan-to-cut-data

Scan in your design and save it as a cut or draw file. ScanNCut will automatically create cut lines.

## Five fonts and 600 built-in designs, including 100 quilt patterns

Choose from basic shapes, intricate designs, borders, quilt patterns, fonts and more. Simply select a design, and then see it on your choice of material.

## Scrapbooking and fabric cut

Now it's simple to cut thin or scrapbook paper so you can create your own personal cards, paper crafting or scrapbook layouts. Cut titles and background designs, or shape to enhance scrapbook pages or cards. The CM600 also cuts precise fabric shapes, with optional accessories as required.

## Direct cut

Scan your material, create the outline cuts and select your design straight from the surface to cut out. Remove the hassle of hand-cutting designs from your favourite papers and fabrics.

## Pen draw (optional)

With the optional pen and pen holder, you can draw patterns on paper and fabric – whether from previous scanned images or built-in designs. Pair the erasable draw function with cutting, draw your seam allowance and get precise sewing guidelines.

Bright, large color LCD touch screen display
